DESCRIPTION

The patented cable pulling grip (sock) with quick-release fastener and swivel has an integrated swivel, which compensates for the twisting of the cable in the tube and thus protects the insertion system, the pulling sleeve and the cable enormously. The quick-release fastener, an ergonomically shaped hook, allows the unit to be attached and pulled in within seconds and there is no longer any need for time-consuming screwing and unscrewing. The total breaking load of 200 kg has been tested on the hook, the connecting pressures, the swivel and the stainless steel pulling sleeve braid. The hook, the connections and the pulling sleeve braid are made of high quality stainless steel, thus no rusting and long life of the cable pulling grip (sock).

Optimal area of application: The flexible stainless steel double braid supports cables of 4 - 15 mm diameter.

Scope of delivery: 1 x Cable pulling grip with quick-release fastener \varnothing 4 - 6 mm or \varnothing 6 - 9 mm or \varnothing 9 - 15 mm.
